The non-woven cleaning wipes is constructed of 45% polyester and 55% wood pulp and has a basis weight of 50gsm. Cleaning wipes is soaked and moistened with IPA solution, which can effectively remove oil, sweat, dust, glue and stains. Spunlace Wipes are Pre-saturated with 99.9% Electronic Grade IPA Solution used in the Preventive Maintenance of Card Printers and Transaction Devices to clean the Thermal Print Heads, Platen Rollers, and Interior Components of the Device. It is widely recommended for Cleaning LCD Computer Screen, POS Terminal, ATM Terminal, Keyboard, Label Printer and other Equipment where Ink Stains and Adhesive Residues are difficult to remove.

Applications

IPA cleaning wipes are suitable for daily cleaning of large areas and can be used for card printers, thermal printers, barcode printers, label printers, inkjet printers, ATMs, card readers, LCD screens, mobile phones, keyboards, glass, and more.

Has cooperated with many overseas companies to formulate OEM, quality assurance, fashionable appearance, excellent effect and favorable price. Regular cleaning will extend the life of the printhead and provide better print quality.
