Thermal Printhead Grinding Pads are specially designed to repair minor scratches on the printhead.

Laminated diaphragms produced by yousite are coated with aluminum oxide to remove burnt contamination and refurbish Print Head.

Store the discs in an airtight bag after use, however each disc can be used up to 6 times!t can killed most Bacteria.

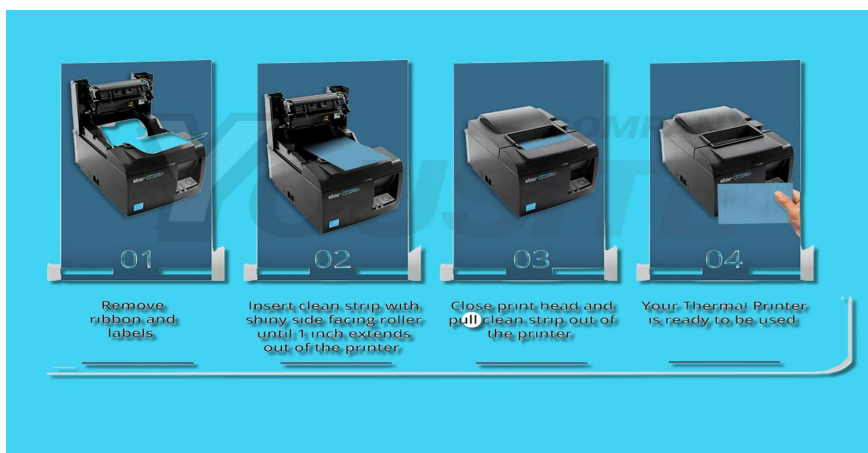

Cleaning Film Lapping Film can be made into sheets of various sizes: 3"x6", 4"x6", 4"x8", or customized according to customer requirements.

Applications

Thermal Printhead Grinding Pads can be used with all thermal printer printheads.

This is the main reason why the daily use of barcode machines and thermal transfer printers causes broken needles and reduced service life of the print head. Our company has developed special cleaning kits in combination with various brands of barcode printers (TSC, Zebra, Boss, Demas, Markon, Videojet, SATO, Toshiba, etc.).

The service life of the print head is greatly improved, and the irregular maintenance of the printer operator is regulated. Reduce the cost of consumables for the majority of enterprise customers.
